

# Metal A Frames

COS100 Series

Our metal A-frames are double sided and easily transportable. These frames can be used both indoors and outdoors - excellent for attracting attention to special offers or sales. The frames are made with black powder coated 1" x 1" steel tubes, rubber coated handle, hinges, and latch. Unlike other metal A frames, this black steel A frame is designed with channels to easily slide the signage in and out. With the double-sided frame, you can display 2 different graphics in the same sign holder. This gives you twice the exposure of ordinary sign frames. Corrugated plastic sheets or rigid PVC sheets are recommended for outdoor usage. Different poster sizes available.

## Product Features:
