

# Outdoor Poster Stand

Model#: COS400A

Weather resistant double-sided outdoor poster board . Can also be used indoors. The base can be filled with sand or water to be anchored down on the street. If you're looking for minor wind tolerant outdoor signage, this is the perfect choice! Passing pedestrian traffic from either direction can't help but notice this smart outdoor poster stand. You can replace this banner to create fresh signage as often as you like. Comes with snap frames on both sides and built-in wheels for easy mobility. The snap frame isn't water proof so if using paper poster, lamination is recommended.
