Snap Poster Rails
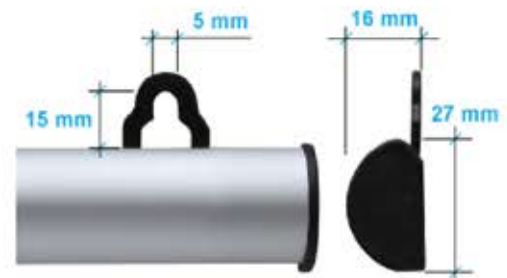

The Poster hanger rails are designed for printed posters and light weight banner material and one of the simplest methods for displaying light weight posters. They are supplied as a set consisting of one top rail, one bottom rail and two plastic hanging loops. The poster rail uses the top rail to securely hold the graphic and suspend it from the wall or ceiling, with the bottom rail keeping the graphic taut and readable. The poster rails have adjustable hooks along the top rail for installation.
