

H Wire Step Stake

Model#:H10-30

Step Stakes are the most popular and economical option for installing temporary corrugated plastic signs in soft surfaces such as grass, soil or sand. They conveniently and easily insert into the flutes of corrugated plastic, and with foot pressure into the ground. The economy step-stake wire frame is 10"W x30"H and designed to handle your coroplast corrugated signs. Wire stake signs are great for advertising outdoors because the sign can be pushed into the ground by using the wire part. Ideal for real estate advertising, political campaigns, garage sales and more. It's made from 9-gauge (0.148") steel wire.

Product Features:

- Fits 4 mil 18"x24" corrugated plastic signs
- Wires insert directly into the signs
- 9 gauge galvanized wire (.148")
