- Fully assembled and ready to use
- Also available with wheels for easy transport
- White color available in 24" x 36"

Our metal A frames are double sided and easy to transport. These A frames can be used both indoors and outdoors and are excellent for attracting attention to special offers or sales. The frames are made with black powder coated 1"x1" steel tubes, rubber coated handles, heavy duty hinges, and latches. Unlike other metal A frames, this black steel A frame is designed with channels to easily slide the poster in and out. With the double sided frame, you can display two different posters on each side of the frame. This gives you twice the exposure of ordinary sign frames. Corrugated plastic sheets or rigid PVC sheets are recommended for outdoor usage. We offer 18"x24", 24"x18", 22"x28", 24"x32", 24"x36", 24"x48", 32"x48" and 36"x48".
