The ceiling hanging displays are designed to be suspended for maximum visual effect, allowing the brand to stand out above the crowd. They can be suspended one within another. This unique design not only increases your brand recognition but also goes a long way in attracting more people. The pillowcase style fabric graphic slips over the entire frame and zips closed to secure it in place. The aluminum frame structure breaks down into pieces for shipping in a padded carrying bag. Hanging displays are not only used at trade shows but also in retail shops, hotel foyers and convention rooms. We offer various shapes and sizes. A black padded bag and hanging hardware are included. Recommended for indoor use only.
